

## Infants

During February we had to say good bye to our little friends who moved up in to toddlers: Liora Xavion, and Shanzay.. sad to see them leave and happy they are grown up.

This month we welcome our new babies Viyen , Tejal , Daniel. Our interest for the week will be focused on transportation, teaching the little ones how we get to and from places we want to go. Also, we would like to welcome our new teacher MS Jasneet into infants, looking forward to working with you.

We will be welcoming also new babies who will start with us very soon. Looking forward to what march will bring to us and many more wonderful adventurers with the children. With love, infant one team

# Toddlers

In the month of March, we will be focusing on more hands on art activities for the children in Toddler 1. We have been able to explore art using our hand prints, foot prints and hand stamps. Through this, the children are able to develop and enhance their fine motor skills. The teachers have observed that the children thrive and enjoy art much more when they are able to lead the activity themselves with little to no help. They adjust their hold many times but In the end they will be able to find a way to successfully use them and enhance their palmar grasp skills along the way. During Valentine's, the children enjoyed making valentines wreaths on paper plates using heart cut outs. Over time we hope to bring in new activities for the children so that they can develop more skills and have as much fun as they can.

# Preschoolers

Time flies so fast! During last months, we learned about Christmas, winter, food-healthy unhealthy, sweet, salty or sour and food groups like dairy, vegetables , grains , meat and many more. Most interesting part, we learnt what's going to happen to our body after eating healthy or unhealthy meals. Also, every week, we have something new in our weekly focus where we learn about letters, numbers, shapes and colours.

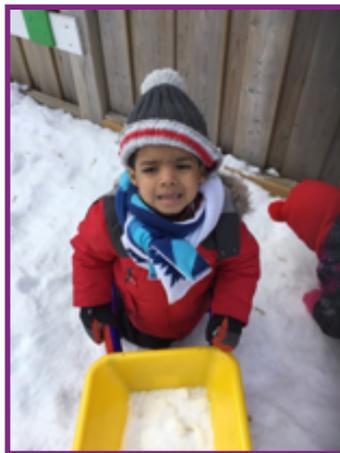

During March, we are continuing learning about food as we see children love to cook different food items and feeding their babies during free play in our classroom. Also, at the same time, according to children's interest, we are also working on tracing and writing some letters and numbers, trying to pronounce the spellings of our names, and sentences like " my name is\_\_\_\_", "I am \_\_\_ years old". To expand their learning, we have weekly focus, displaying number, letter, shape and colour of the week and colour/shapes boards in our classroom. Also, we encourage parents to help children in their learning by providing them interest of the week or telling them that what we learn today or what are we going to learn this week.

We would also like to thank our parents for all of their support, encouragement and understanding during children growth and their transitioning period. We appreciate that and are looking forward to work with you all and help children grow and learn.

## Kindergarteners

As the snow is slowly melting and spring is arriving we get to focus on new beginnings. The sun is shining, flowers blossoming and trees filling with leaves. For the month of March we will focus on how things grow. The children will be learning about how things grow in nature and how we grow as humans. Our main

focus is how we have to care and love those things in order to grow. We will have activities set out where they are able to care for plants, babies and themselves.

As we begin to see the plants growing outside we will set out a class project of growing our own in the classroom. We will be using the sunflower seeds we got from Santa back in December, this way the children will be able to see the plant develop over time. Starting from a seed to a beautiful flower, they will help water it and care for it. By the end of the project we will have our own garden of flowers that the children can call their own. We will have weekly lessons during circle talking about the flowers development as well the things needed to care for it. We will also incorporate how these tasks can be used to take care of ourselves for us to grow.

# Supervisor

Happy March everyone.

As we all know, all young children thrive and learn in a society dedicated to ensuring they reach their full potential, we help our children reach their potential by making sure they have the three aspects: (1) Believe (2) Respect (3) Trust, believe in us as Early Childhood Educators, respect diversities, and trust in themselves and their abilities.

April 2<sup>nd</sup> is a Community workshop for Lullaboo families. Lucille Shenouda, an Occupational Therapist, will give parents some strategies and discussing fundamental skills that build a solid foundation for learning which includes, fine motor skills, perceptual skills, writing skills etc. Wishing all our children and families a safe and enjoyable time.

**Brampton  
Queen Campus** | **APR 2**  
5:30pm to 6:30pm

Mar  
17th

St. Patrick's Day

Mar  
19th

Nowruz,  
Iranian New Year

Mar  
21st

Down Syndrome  
Awareness Day

## Centre Reminder

For March we will be focusing on Community Helpers and different roles in our community. We look forward to booking outside visitors to come visit your child's classroom throughout the month of March. Stay tuned for further info!

We also invite families to visit their child's classroom and do a "show-and-tell" about your professions. Our classes are very interested in learning about different roles and finding out what parents do when they go to work for the day. If you are interested in visiting your child's class, please let the office know. We'd love to have you join us!

## ★★★★★ Reviews

Best daycare for my 2.5 years old. He is in pre school room. Big thanks to his teachers in the pre school room1. They are very patient, understanding and loving. \_ Sukhjeet Kaur

## Director

Happy International Women's Day!

This year it is celebrated on Sunday March 8<sup>th</sup> 2020. We celebrate women's achievements throughout history and across nations. It is also known as the United Nations (UN) Day for Women's Rights and International Peace.

International Women's Day events are held worldwide on March 8. Various women, including political, community, and business leaders, as well as leading educators, inventors, entrepreneurs, and television personalities, are usually invited to speak at various events on the day.

The International Women's Day logo is in purple and white and features the symbol of Venus, which is also the symbol of being female. The faces of women of all backgrounds, ages, and nations are also seen in various promotions, such as posters, postcards and information booklets, on International Women's Day.

A special thank you to all our strong leaders in our lives, we celebrate you and all that you do!
