

Infants

It's the month of June and it has been a busy and productive season for our infants in May and they are learning a lot and having fun continuously. The infants have been having so much fun outdoors on the playground. They are enjoying the fresh air and the sunny weather with their cute summer outfits. While indoors, they have been busy as well, their project interest is colouring with a sub-topic of shapes, nature, fruits. The infants explored the outlines of the shape of an apple, and the trees and leaves by doing artworks with tissue paper with glue and made some outlines using a paper plate as the base. We also made Mother's Day art and cards using assorted colours of tissue paper, colourful pipe cleaners and creativity to make the flowers. We also had the SickKids fundraiser event and we made keychains using beads and laminated flowers to give to the infant's parents. Afterwards, we also made a tie-dye t-shirt using natural household materials like food colouring, vinegar and salt. Overall, this month has been really fun and the infants have developed and grown so much. Great job!

Toddlers

As numbers may start decreasing we do not want to let our guard down, we still want to keep our children safe every day. Here at Lullaboo we make sure we take precautionary measures to keep our kids safe. Washing our hands before and after eating and throughout the day. Beds are sanitized daily along with bedsheets. We want everyone to stay safe and comfortable even during these hard times.

We first want to welcome our new toddler teacher Ms. Elexa who has recently joined our classroom. If you see her at the door don't forget to say hi. Last month was full of excitement and fun for our precious ones. They had the opportunity to participate in many activities based on different kinds of animals. Some activities that our toddler enjoyed and you can also do at home with your child, was making Paper plate Spider. This includes a paper plate, googly eyes and black construction paper, or a spider web made from yarn and sticky mac tac.

This month we will move on from animals and insects to transportation. Our toddlers love cars so we are going to extend the knowledge on different vehicles. Each week we will focus on one category of transportation like vehicles we see on the road, construction vehicles, transportation in the sky, transportation in the water. We will discuss transportation weekly so they can broaden their horizon on the concept to each vehicle. We best hope to support the children with exploring this new interest.

Preschoolers

Pre-k 2 had spent the month of May full of excitement and engagement in the activities based on the theme of 'Community Helpers' and 'Different means of transportation.' Children enjoyed doing the artwork and making boats, Hot-air balloons, tool-kits, different badges, community helpers picture book and many more things along with learning about different shapes, colours and numbers through their interest based projects. They improvised their cognitive skills

through hands-on learning; for example- teachers and children made different types of boats using different materials like straws, sponges and paper and then we observed how they went in the water.

Moreover, as we were working on developing our skills through engaging in the interest-based projects and topics, preschoolers were also enjoying participating in the weekly events of SickKids fundraising' and celebrations of 'Mother's Day.' Children showed so much enthusiasm while making picture frames and flowers for their Mothers and feel very special. Also, making key chains and tie-dye their t-shirt turned out to be a very exciting and colourful event.

PIC•COLLAGE

Event Calendar

World Milk Day

National Cheese Day

Father's Day

National Indigenous People's Day

International Yoga Day

Learning Fun

Now that the flowers have blossomed, and the birds have their orange feeders, it is time to get some activities for the children. With all the flowers that are in the parks or in the backyard. You and the children can make some nice art work! When going for a nice walk or talking the children to the park, pick a few dandelions on the way. Parents, outline a flower pot on a piece of card board. The pieces of card board can be squares or the shape of a flower pot. Next poke holes. Have the children push through the flowers in the holes creating a 3D flower pot.

The items you will need: card board, permanent marker, scissors and dandelions.

Director

I would like to thank all our Lullaboo families for their generous donation to SickKids.

Without friends and supporters like you, this year's event would have never reached such a high level of success. The support SickKids receives from its community is integral to achieving the world-leadership role to which we aspire. It's not over yet, we are still looking to reach our 2021 goal of \$50,000

Thank you for understanding the importance of making our children's health a priority. Because you believe, countless sick children will not only feel better - they will be better too.
